Rochak Siwach

rochaksiwach13@gmail.com +91-9354846604 LinkedIn GitHub Portfolio

Professional Summary

Full Stack Developer specializing in React.js and modern backend technologies, building scalable web applications with responsive interfaces and robust server-side logic. Built the live, multi-user editor and video-call UI for CodeSphere, a real-time collaborative coding platform, and maintain SiwachUI, an open-source UI library with 15+ reusable components. Experienced in integrating REST APIs, WebSockets, and real-time systems to deliver end-to-end features across the frontend and backend.

Skills

- **Frontend Technologies:** React.js, JavaScript, HTML5, CSS3, Responsive Web Design, GSAP
- **UI Engineering:** Component-Based Architecture, Reusable Components, UI Development, Vite
- **Tools & Platforms:** Git, GitHub, VS Code, Vercel
- **Additional Technologies:** Node.js, Express.js, RESTful APIs, MongoDB, WebSockets, WebRTC

Experience

Research Intern, *National Institute of Technology Delhi (NIT Delhi)* 06/2026 – 08/2026 | Delhi
- Joined the lab's deep learning-based low-light image enhancement research, working with image decomposition techniques and neural network model evaluation.
- Supporting technical documentation and literature review alongside the lab's senior researchers.

Frontend Web Development Intern, *MNT Dreams Pvt. Ltd* 06/2025 – 07/2025 | Gurugram
- Replaced repeated one-off UI markup across multiple product pages with a shared set of reusable React components, cutting down duplicate code and simplifying future updates.
- Built end-to-end signup/login flows with client-side form validation to catch input errors before submission and reduce failed onboarding attempts.
- Developed a real-time leaderboard component that pulled and displayed live application data without requiring a page refresh.
- Reviewed and adjusted CSS layouts across desktop, tablet, and mobile breakpoints to fix inconsistent spacing and alignment issues found during testing.

Projects

CodeSphere, *Real-Time Collaborative Coding Platform*
- Building the React front end for a live, multi-user code editor — rendering simultaneous edits from multiple participants in real time via **Socket.io** without UI lag or merge conflicts.
- Designing and integrating the WebRTC video-call interface directly into the editor layout, so collaborators can see and talk to each other without leaving the workspace.
- Built room-creation, join, and session UI flows backed by REST APIs and MongoDB.

SiwachUI, *Personal Open-Source Component Library*
- Building a theme-ready React component library — 15+ components shipped so far (buttons, cards, sliders, forms) — in the spirit of ShadCN/Ark UI, focused on reusability across projects.
- Animated component interactions with GSAP and Lenis smooth-scroll for a polished, app-like feel.
- Created a Vite-powered documentation site with live component previews, copy-paste code snippets, and CLI install support to streamline developer adoption.

Playground, *Frontend Web Application*
- Collaborated with one teammate to design and build a responsive web app using HTML, CSS, and JavaScript, contributing core interactive JavaScript logic alongside layout and styling work.
- Focused on clean UI design and cross-device responsiveness; deployed the finished app for public access on a modern hosting platform.

Education

B.Tech in Computer Science and Information Technology (CSIT) 2023 – Present | CGPA: 7.6 | Gurugram
Dronacharya College of Engineering, Gurugram

Certifications

- Web Development Workshop – IIT Roorkee
- Computer Networking Basics
- Ethical Hacking Workshop

Achievements & Activities

- Participated in the CBSE National Athletics Meet at Chhatrasal Stadium.
- Runner-Up, Zonal Kabaddi Tournament.
- Member, College iOS Club.
